AND CONSUMABLE PARTNER

COVID-19 National Lockdown

Dear Valued Customer

I am sure that you are all following the development of the COVID-19 crisis closely and are aware of the measures announced by President Ramaphosa in South Africa on Sunday, 15 March 2020.

To combat the pandemic we need to enforce a nation-wide lockdown for 21 days with effect from midnight Thursday, 26 March 2020 until midnight Thursday, 16 April 2020.

I want to assure you that we as 3JS are in full support of the President's announcement and fully aware of the vital role we responsible for in terms of essential medical consumables to the medical industry.

The health and safety of our staff is of utmost importance hence the reason we have reduced our work force by 60% and made use of the least amount of staff to support our Health Care Professionals, Hospitals and Pharmacy's.

We will do all we can to meet your demands and request that you please order only the essentials. 3JS is fully committed and understand the challenges we will meet during the next few weeks and will do our very best in ensuring that product is supplied timeously and regularly.

Our admin and sales teams are working from home and will be in a position to assist you with your requests. Where possible please contact the staff member directly on their cell phones as the office phone is extremely busy.

We have no doubt that we will stand together as a nation and take on this massive challenge in true South African style.

Keep Safe and remember to Sanitize

Yours Sincerely

Mike Labuschagne
